

Tioga Cliff

► Overview

At an elevation of 9000' and receiving afternoon shade, the **Tioga Cliff** is a good summer option for **East Side** climbers. The cliff is well set up for gym-like sessions with easy access and numerous well-bolted routes. Although the rock quality is good – sometimes great – the routes are occasionally not sustained and tend to feature boulder problems with good rests.

► Season

Typically, late May to September offer the best conditions for climbing. The crag goes into the shade at roughly 1:00 pm.

! Caution

The terrain above the cliff is comprised of loose blocks and scree. Although most rock fall occurs during weather events, it should be taken into consideration at all times.

► Directions

From the east:

Drive 8.0 miles on CA120 from US395 toward Yosemite National Park to a pullout (37.945537°, -119.226189°) on the left with an interpretive sign about “Don’t Fence Me In”.

From the west: Drive 4.0 miles on CA120 from Tioga Pass (the National Park gate) along CA120 to a pullout (37.945537°, -119.226189°) on the right side of the road with an interpretive sign about “Don’t Fence Me In”.

On foot, follow a good trail that heads downhill though some talus then traverse right (south-southwest) 0.1 miles to the right side of the **Tioga Cliff**.
